SOFTWARE ENGINEER

Full-stack software engineer with a unique background in audio engineering and a strong foundation in programming. Flatiron School graduate, with experience in React, JavaScript, and various other OOP languages and technologies. Strong problem-solving and communication skills, as well as a proven ability to learn and apply new technologies quickly. Seeking a challenging and rewarding software engineering role where I can utilize my technical and team-oriented skills to make a positive impact.

TECHNICAL SKILLS

JavaScript, TypeScript, Node, React, Redux Toolkit, Express, Websockets, MongoDB, Firebase, PostgreSQL, SQLite, RESTful APIs, GitHub, HTML, CSS, Figma

TECHNICAL PROJECTS

ShoppingApp | [Github](#) | [Demo](#)

Clothing and sneaker shopping app

- Developed an e-commerce web app allowing users to browse and shop for sneakers and clothes, with the ability to sign in or sign up using email or Google.
- Utilized Vite, React, TypeScript, Redux Toolkit, Redux Saga, and Firebase to build the application.
- Sole engineer, responsible for all aspects of development from planning and design to deployment with Netlify
- Implemented a checkout system using Stripe for secure payment processing.

iChatApp | [Github](#)

iMessage Clone

- Built an iMessage clone application that allows users to create group chats or chat directly with friends, with the ability to sign in or sign up using email or Google.
- Utilized Next.js, Apollo GraphQL, Chakra UI, Node.js, MongoDB, and Prisma in the development process.
- Acted as the sole engineer, managing all aspects of development from planning and design to deployment.
- Implemented a secure authentication system using email and Google sign-in, ensuring user privacy and data security

TicketMasterz | (Frontend) [Github](#) | (Backend) [Github](#)

Browse sporting events, read reviews and leave review

- Developed an event review app allowing users to view events and leave a review or comment on other reviews.
- Utilized React, Ruby, Sinatra, and SQLite to build the application.
- Served as lead backend engineer on the full-stack project, working closely with two other engineers to plan, design, and implement the application.
- Implemented a database using SQLite to store and manage user reviews and comments.

EXPERIENCE

Audio Engineer/Music Producer - Loud Studios NYC

Brooklyn, NY 08/2017 - Present

- Responsible for setting up and operating recording equipment, as well as editing and enhancing recorded audio using specialized software.
- Oversaw the entire music production process, including working with artists to develop ideas, selecting and booking recording sessions, and working with other audio engineers to achieve the desired sound.
- Utilized technical skills and creative vision to bring musical ideas to life and produce professional-grade recordings. Several songs produced by this role have been played on the radio.

Warehouse Associate - Empire Merchant

Brooklyn, NY 06/2017 - 08/2017

Warehouse Associate - Amazon Fulfillment Center

Davenport, FL 10/2016 - 03/2017

- Responsible for various tasks related to the storage and distribution of products.
- Receiving and unpacking incoming shipments
- Demonstrated the ability to work efficiently and accurately in a fast-paced and physically demanding environment, meeting production goals and deadlines.
